

ABOUT tretford

Our passion

tretford is high quality carpeting that is made in Germany with natural materials — for a healthy living and working environment. Our carpet's unique product features, along with its proven quality, have established a brand identity that is fueled by our passion. For more than 60 years now, we have been manufacturing our flooring — partly by hand — with Cashmere goat hair in Wesel on the Lower Rhine. In the meantime, the brand name "tretford" has evolved into a synonym for this ownermanaged company; it stands for boldly colored, high-quality textile flooring with a characteristic texture.

Our philosophy

Sparing and gentle use of natural resources along with responsible business practices shape our corporate behavior. tretford puts ecological and social responsibility at the heart of its business. We are making strides towards sustainable manufacturing with products made exclusively of natural, recycled or biodegradable materials.

tretford's special feature

Carpets by tretford, which feature the characteristic ribbed design, are available in 45 colors that can be combined to suit the style of your choice. Countless designs can be created and realized thanks to non-fraying materials. And since tretford carpets have a positive influence on the indoor climate, they are ideal for living and working environments.

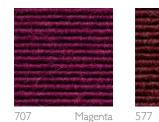

Our carpeting owes this beneficial effect to its main component, the exquisite top hair of the Cashmere goat with its hygroscopic properties. Like practically no other material, it can absorb moisture from the air only to release it back into the room environment as needed. Moreover, this natural raw material also bonds fine dust particles thanks to the scaly structure of goat hair. This is good news for allergy sufferers since the indoor "dust load" is many times lower than with smooth floors. And even beyond the underfoot warmth it provides, carpeting with Cashmere goat hair is also dirtrepellent, absorbs sound and can be expected to have a long service life.

Our products largely consist of the long top hair of the Cashmere goat; indeed, some of our carpet lines boast pile material with up 80% goat hair. We use the hair of highland goats from Inner and Outer Mongolia. In fact, we rely on renewable raw materials not just for our main carpet component but across the board. The processed virgin wool we use, the jute we use, and the natural latex we use as an adhesive bed for installing some of our products have in common that they are all renewable, natural materials. Cheviot sheep, which graze mainly in Europe, provide the soft virgin wool we use. But we also use recycled materials to manufacture tretford carpeting. The backing of our carpet tiles, for example, is made of polyester fleece, which is partly made of recycled fibers.

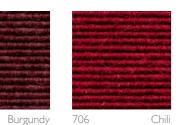

tages of natural cashmere goat's hair with the extreme durability of nylon. It reduces sound reverberation in shared workspaces and dramatically diminishes noise transfer through floors caused by footfall or impact.

tretford for commercial buildings combines all the advan
The natural properties of cashmere goat's hair absorb fine particulate dust matter, creating a healthier and safer working environment. The low maintenance carpet is also highly durable, even when used with castor chairs.

These 45 unique colors are available for roll and 44 colors for tiles (with 70% Cashmere goat hair, 30% polyamide), for heavy commercial use but also for private residences.

Color deviations compared to collection are possible. Stand 04/24, subject to change without notice. Our qualities are produced according to the proven ondulé principle, which gives it its characteristic structure and the quality won't fray.

Detailed technical data can be found at www.tretford.us. You can also request color samples there.

AREA rugs

Our carpets – round or square – come with or without edging or an individualized design. Thanks to their natural pile material consisting of Cashmere goat hair and virgin wool, they are warm, cheerful and durable. Put one to work in your favourite spot at home, at a daycare center, a hotel or a sales room. INTERART rugs are precision-handcrafted in Germany. They are available in a broad color spectrum that leaves nothing to be desired.
